TECHNICAL SKILLS

Tools: Advanced Excel /Google sheets Macros(VBA), Tableau, Power BI, Git-Hub, Jupyter Notebook **Programming Languages:** Python (NumPy, Pandas, Matplotlib, Seaborn, PySpark), **SQL Machine Learning:** Linear Regression, Logistic Regression, Statistics and Probability
Database Management: MySQL, Big Query, Snowflake, DataBricks
Core Competencies: Technical Mindset, Design and Strategy, Visualization, Curious.

EXPERIENCE

Business Analyst | Operations and Excellence | SQL & Python | Third Wave Coffee Jan 2026 to Present

- Led the development of a **store-level 'Pacesetter'** performance model for **~200 retail outlets**, establishing monthly percentile targets to optimize regional sales tracking and operational efficiency.
- Engineered store-level operational metrics and tracking systems during immersive, hands-on barista and inventory manager training to bridge the gap between **field realities and corporate data strategy**.
- Designed and **automated daily inventory and resource allocation dashboards** using SQL and Python, improving stock accuracy and streamlining staff rostering schedules across multiple high-volume cafes.

Business Analyst | Supply Chain Analytics & Operations | SQL & Python | Swiggy Instamart May 2024 to Jan 2026

- Built and optimized complex **SQL** and **Snow SQL** queries for large-scale data extraction(1 mn+), transformation, and loading (ETL), ensuring data accuracy and integrity across critical business reports.
- Optimized **Inventory Health** and **Capacity Planning** for FMCG categories by managing data pipelines from multiple warehouse sources using SQL
- Led **Operations Planning** analytics by automating KPIs for **Supply Chain** metrics (Delivery TAT, Cost Per Delivery), directly improving last-mile efficiency.
- Demonstrated **Customer Obsession** by designing MoM/WoW trend reports that identified service gaps, leading to a 10% improvement in customer retention metrics..
- Streamlined reporting processes by integrating **Python** scripts, reducing manual effort and enhancing data consistency across business functions.
- Supported customer segmentation and inventory management initiatives by designing data models and analytical reports, contributing to better demand planning and operational efficiency.
- Spearheaded **Dispute Resolution** protocols for FMCG categories by conducting **Root Cause Analysis (RCA)** on inventory discrepancies, reducing data quality errors by **10%**.

Data Analytics Tutor | SQL, Python, PowerBI, Tableau May 2021 to April 2023

- Translated complex technical data concepts into clear, actionable insights for non-technical audiences (students and business owners), mirroring the **stakeholder management** required in business analysis..
- Provided one-on-one and group tutoring sessions in Power BI, SQL, Excel, and data visualization tools.

PROJECTS

Data Analysis for a Brazilian Retailer | SQL, BIG Query, MS Excel, Data Analytics | [Git-hub Link](#)

Identified e-commerce trends, including seasonal peaks and buying habits Analysed orders, delivery times. Generated insights for strategic improvements.

Netflix Exploratory Data Analysis | Python, SQL | [Git-hub Link](#)

Through EDA found out analysis like around **70% of the Netflix releases are movies** compared to 30% for series. 300+ movies are produced every year and 80+ tv series. The US followed by India got the greatest number of releases.

Tableau Supply Chain Inventory Optimization | Tableau, Data Analytics, ETL, Business Intelligence | [Tableau Link](#)

Created user-friendly dashboards to facilitate data-driven decision making with data of around 100000 data entries and tracked key performance indicators (KPIs).

Pinpointed inefficiencies in inventory, which could lead to around 20% increase in turnover rate.

Aero fit - Customer Profiling | Python, Statistics and probability | [Git-hub Link](#)

83% of treadmills were bought by individuals with incomes between **USD dollar 35000 and 85000**. With **Fitness level 4 and 5**, the customers tend to use **high-end models** and the **average number of miles is above 150 per week**

Data Analysis using PySpark | Python (PySpark) | [Git-hub Link](#)

Utilized PySpark on Google Collab to analyse a large Last.fm dataset, exploring user listening habits

ADDITIONAL INFORMATION

Languages: English (Proficient), Hindi (Proficient), Kannada (Native), German (Limited Proficiency)

EDUCATION

Data Science & Machine Learning | Scaler

Oct 2023 to June 2024

B.E in Mechanical Engineering | KLE Tech University, Hubballi

Aug 2016 to Oct 2020
